DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 9/18/97 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 U.S.C. § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoda et al, US Patent No. 4,831,610.

Hoda et al disclose a method and apparatus for interactive control of a data recording medium playback apparatus using bar code access comprising: a disk storage 2 for recording a multiplicity of data wherein the data is audio (sound) and wherein the paper on which the identification code is printed contains written note representing in graphic form the content of the sound recorded; a memory 15 for storing a plurality of data, wherein the recorded and the stored data are retrievable using a unique identifying code 18 which assigned to the recorded and stored

data during recording and storing sessions; a scanner 19 for scanning the identification code; a pickup 3 and control unit 13 (see figures 1 and 2; col. 4, line 9 to col. 5, line 42 +).

Claim Rejections - 35 U.S.C. § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoda et al in view of Bergeron et al, US Patent No. 5,126,543. Hoda et al have been discussed above.

Hoda et al fail to disclose or fairly suggest a microphone device for picking up sound.

Bergeron et al disclose an integrated hand microphone with barcode reader and dictation control wherein each dictation station includes a microphone. (see col. 2, lines 62-68).

It would have been obvious for a person of ordinary skill in the art at the time the invention was made to incorporate the microphone of Bergeron et al into the system of Hoda et al in order to provide Hoda et al with voice recording means. Such modification would make the system of Hoda et al more versatile wherein voice and other sounds would be recorded in the disk. Therefore, ^{would have been} it is an obvious expedient well within the ordinary skill in the art.

Response to Arguments

Art Unit: 2876

6. Applicant's arguments filed 1/14/99 have been fully considered but they are not persuasive. (See examiner remarks).

REMARKS:

In response to the applicant's argument page 3, line 1 to page 4, line 10. The examiner respectfully disagrees. It is clearly understandable that the coordination of the identification code with the recordings must be done during recording process in order to facilitate the retrieval and playback. If the recordings are done and saved in the storage without any identification, an operator would not be able to identify a specific recording during a playback session. Therefore, it is inherent that the coordination of identification code with the recordings are done during recording process. The applicant's argument is not persuasive. Refer to the rejection above.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2876

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
